The screenshot displays the Python IDE interface with two windows. The left window, titled 'sample.py', contains the following Python code:

```
weather = 'rain'

if weather == 'rain':
    print('Field have humidity')
    print('No water need, Rain is enough')
else:
    print('Water is needed')
```

The right window, titled 'IDLE Shell 3.10.2', shows the execution output of the script:
